

### **Amendments to the Specification**

On page 6 of the specification, replace the following paragraph:

[[Fig. 2 is a block diagram of a LAASsystem.]]

With this paragraph:

Fig. 2 is a block diagram of a LAAS system.

The only change is to add a space after the acronym "LAAS," as shown below:

Fig. 2 is a block diagram of a LAAS\_system.

### **Amendments to the Claims**

Please amend the claims as follows. Attached as Appendix A is a clean copy of the pending claims as amended herein.

1. (previously presented) A method of detecting a low power condition in a satellite navigation system, comprising:
  - receiving at least one global positioning satellite radio signal;
  - determining a signal-to-noise ratio of the satellite radio signal;
  - calculating from the signal-to-noise ratio a low-power condition error contribution; and
  - calculating a total error based at least in part on the low-power condition error contribution.
  
2. (original) The method of claim 1, wherein determining the signal-to-noise ratio includes:
  - measuring a wide band power of the satellite radio signal over a first time period;
  - measuring a narrow band power of the satellite radio signal over a second time period;
